

Model 1: distributions of the first three cosine coefficients

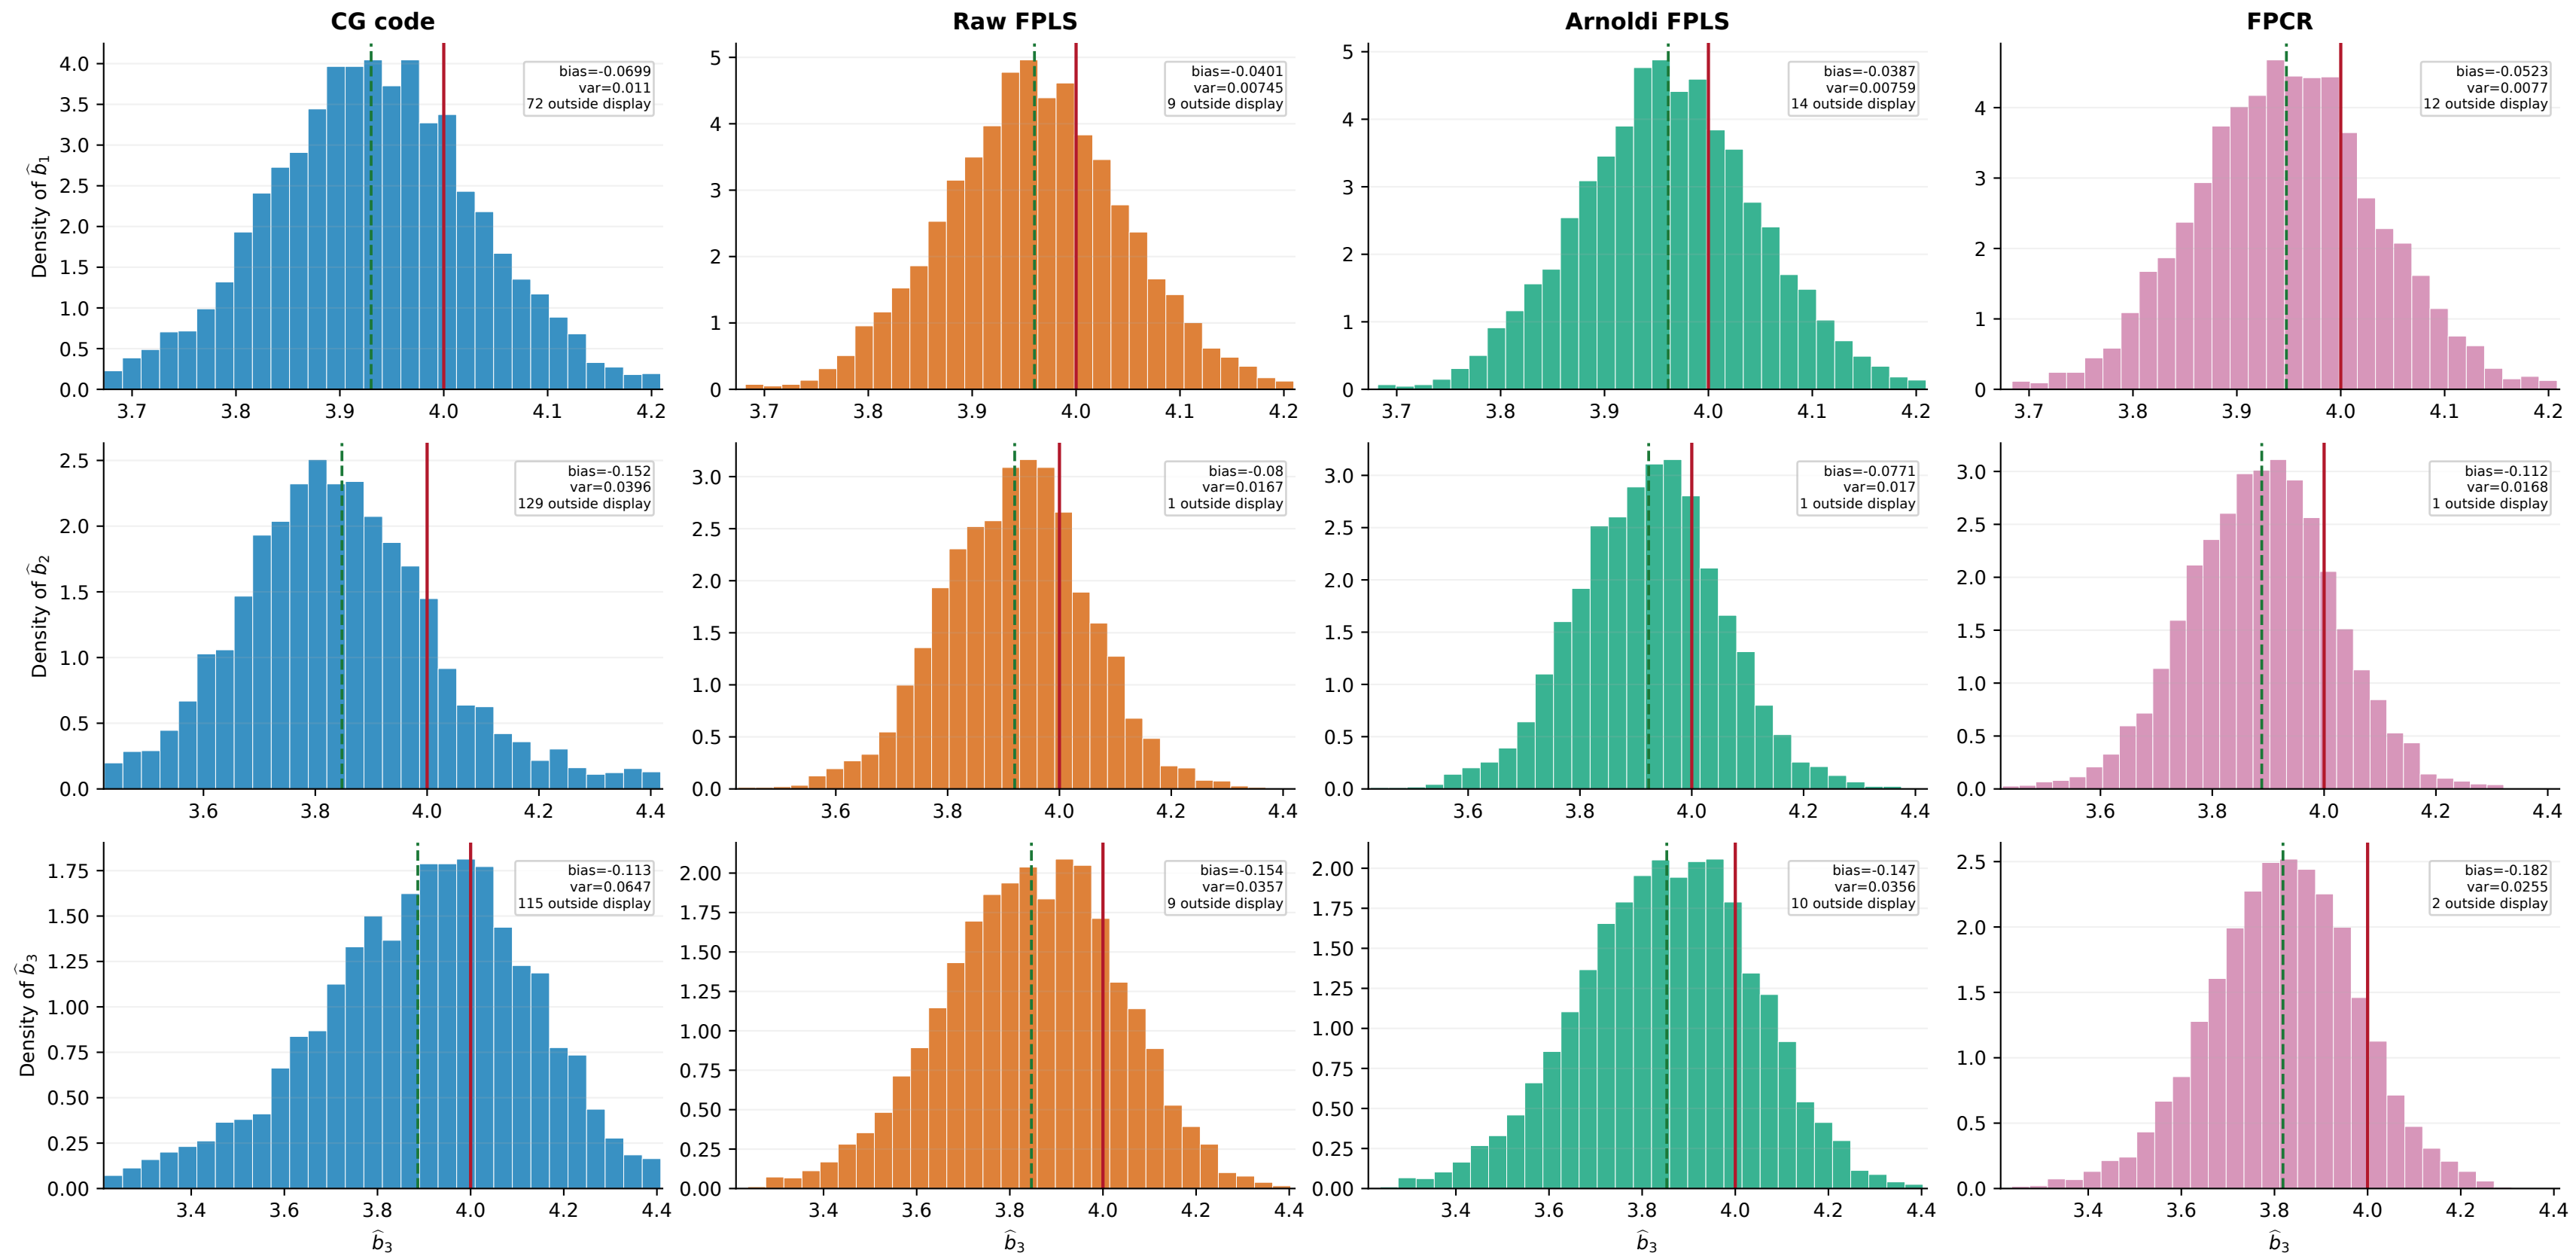

— True - - - Mean

Axes show the central 99% pooled range; omitted numerical tails are counted. Raw-FPLS panels use archived fits not flagged as numerically unstable.

Model 2: distributions of the first three cosine coefficients

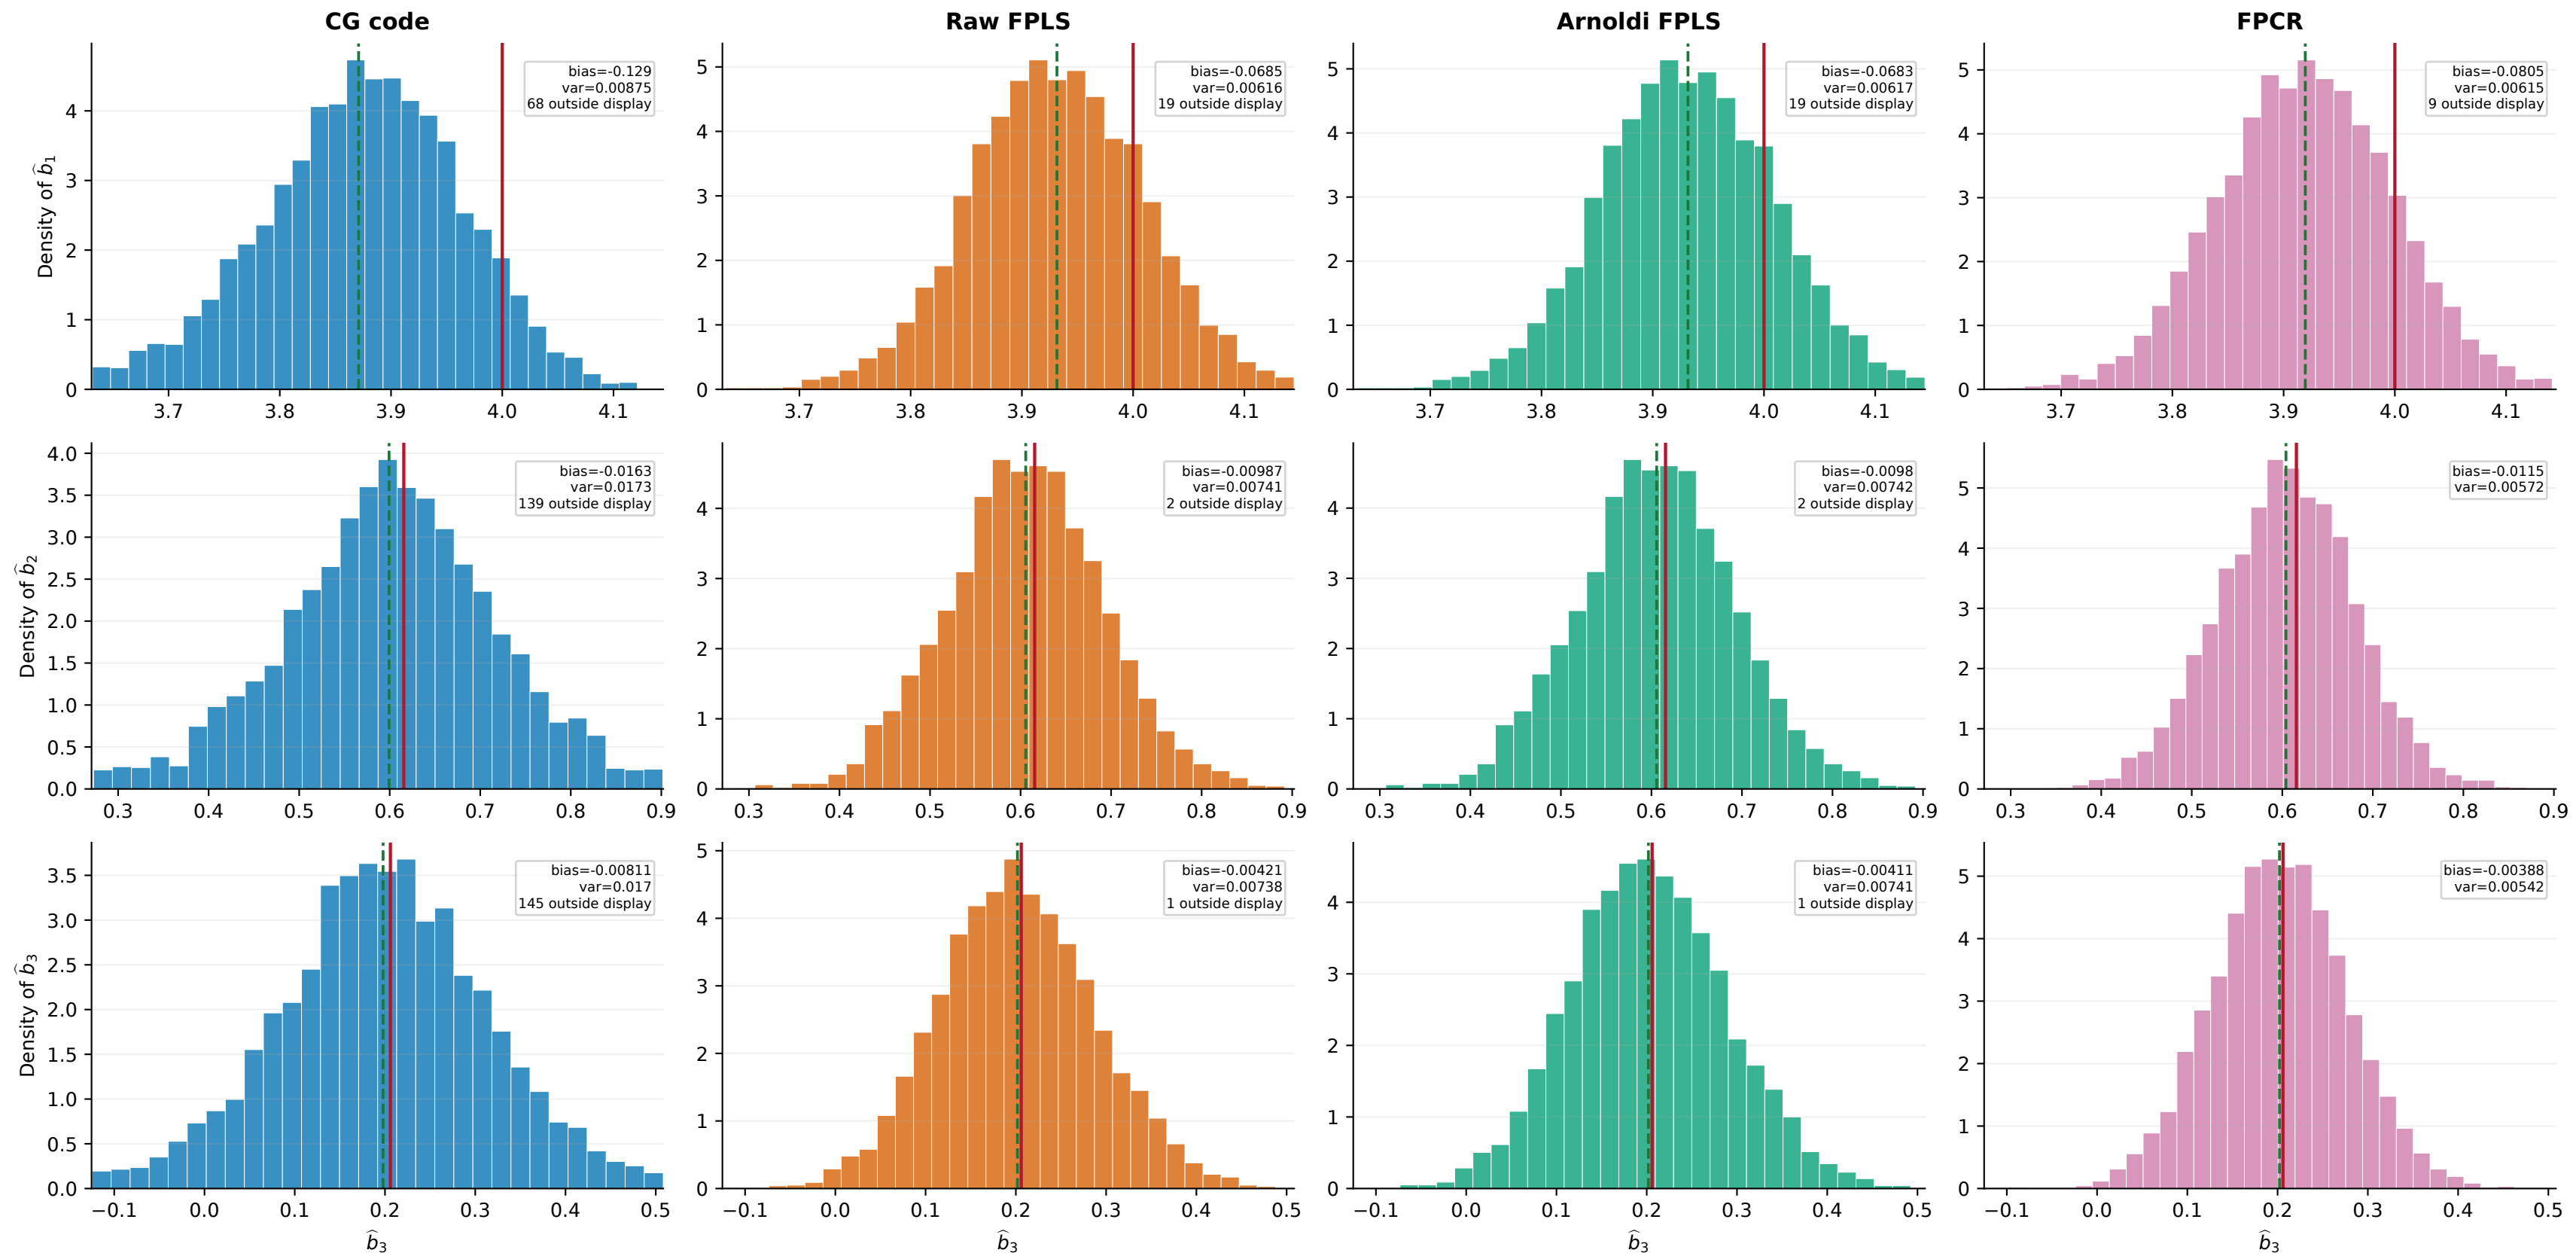

— True - - - Mean

Axes show the central 99% pooled range; omitted numerical tails are counted. Raw-FPLS panels use archived fits not flagged as numerically unstable.

Model 3: distributions of the first three cosine coefficients

— True - - - Mean

Axes show the central 99% pooled range; omitted numerical tails are counted. Raw-FPLS panels use archived fits not flagged as numerically unstable.
