

Model 1: pointwise distributions of the selected slope estimate

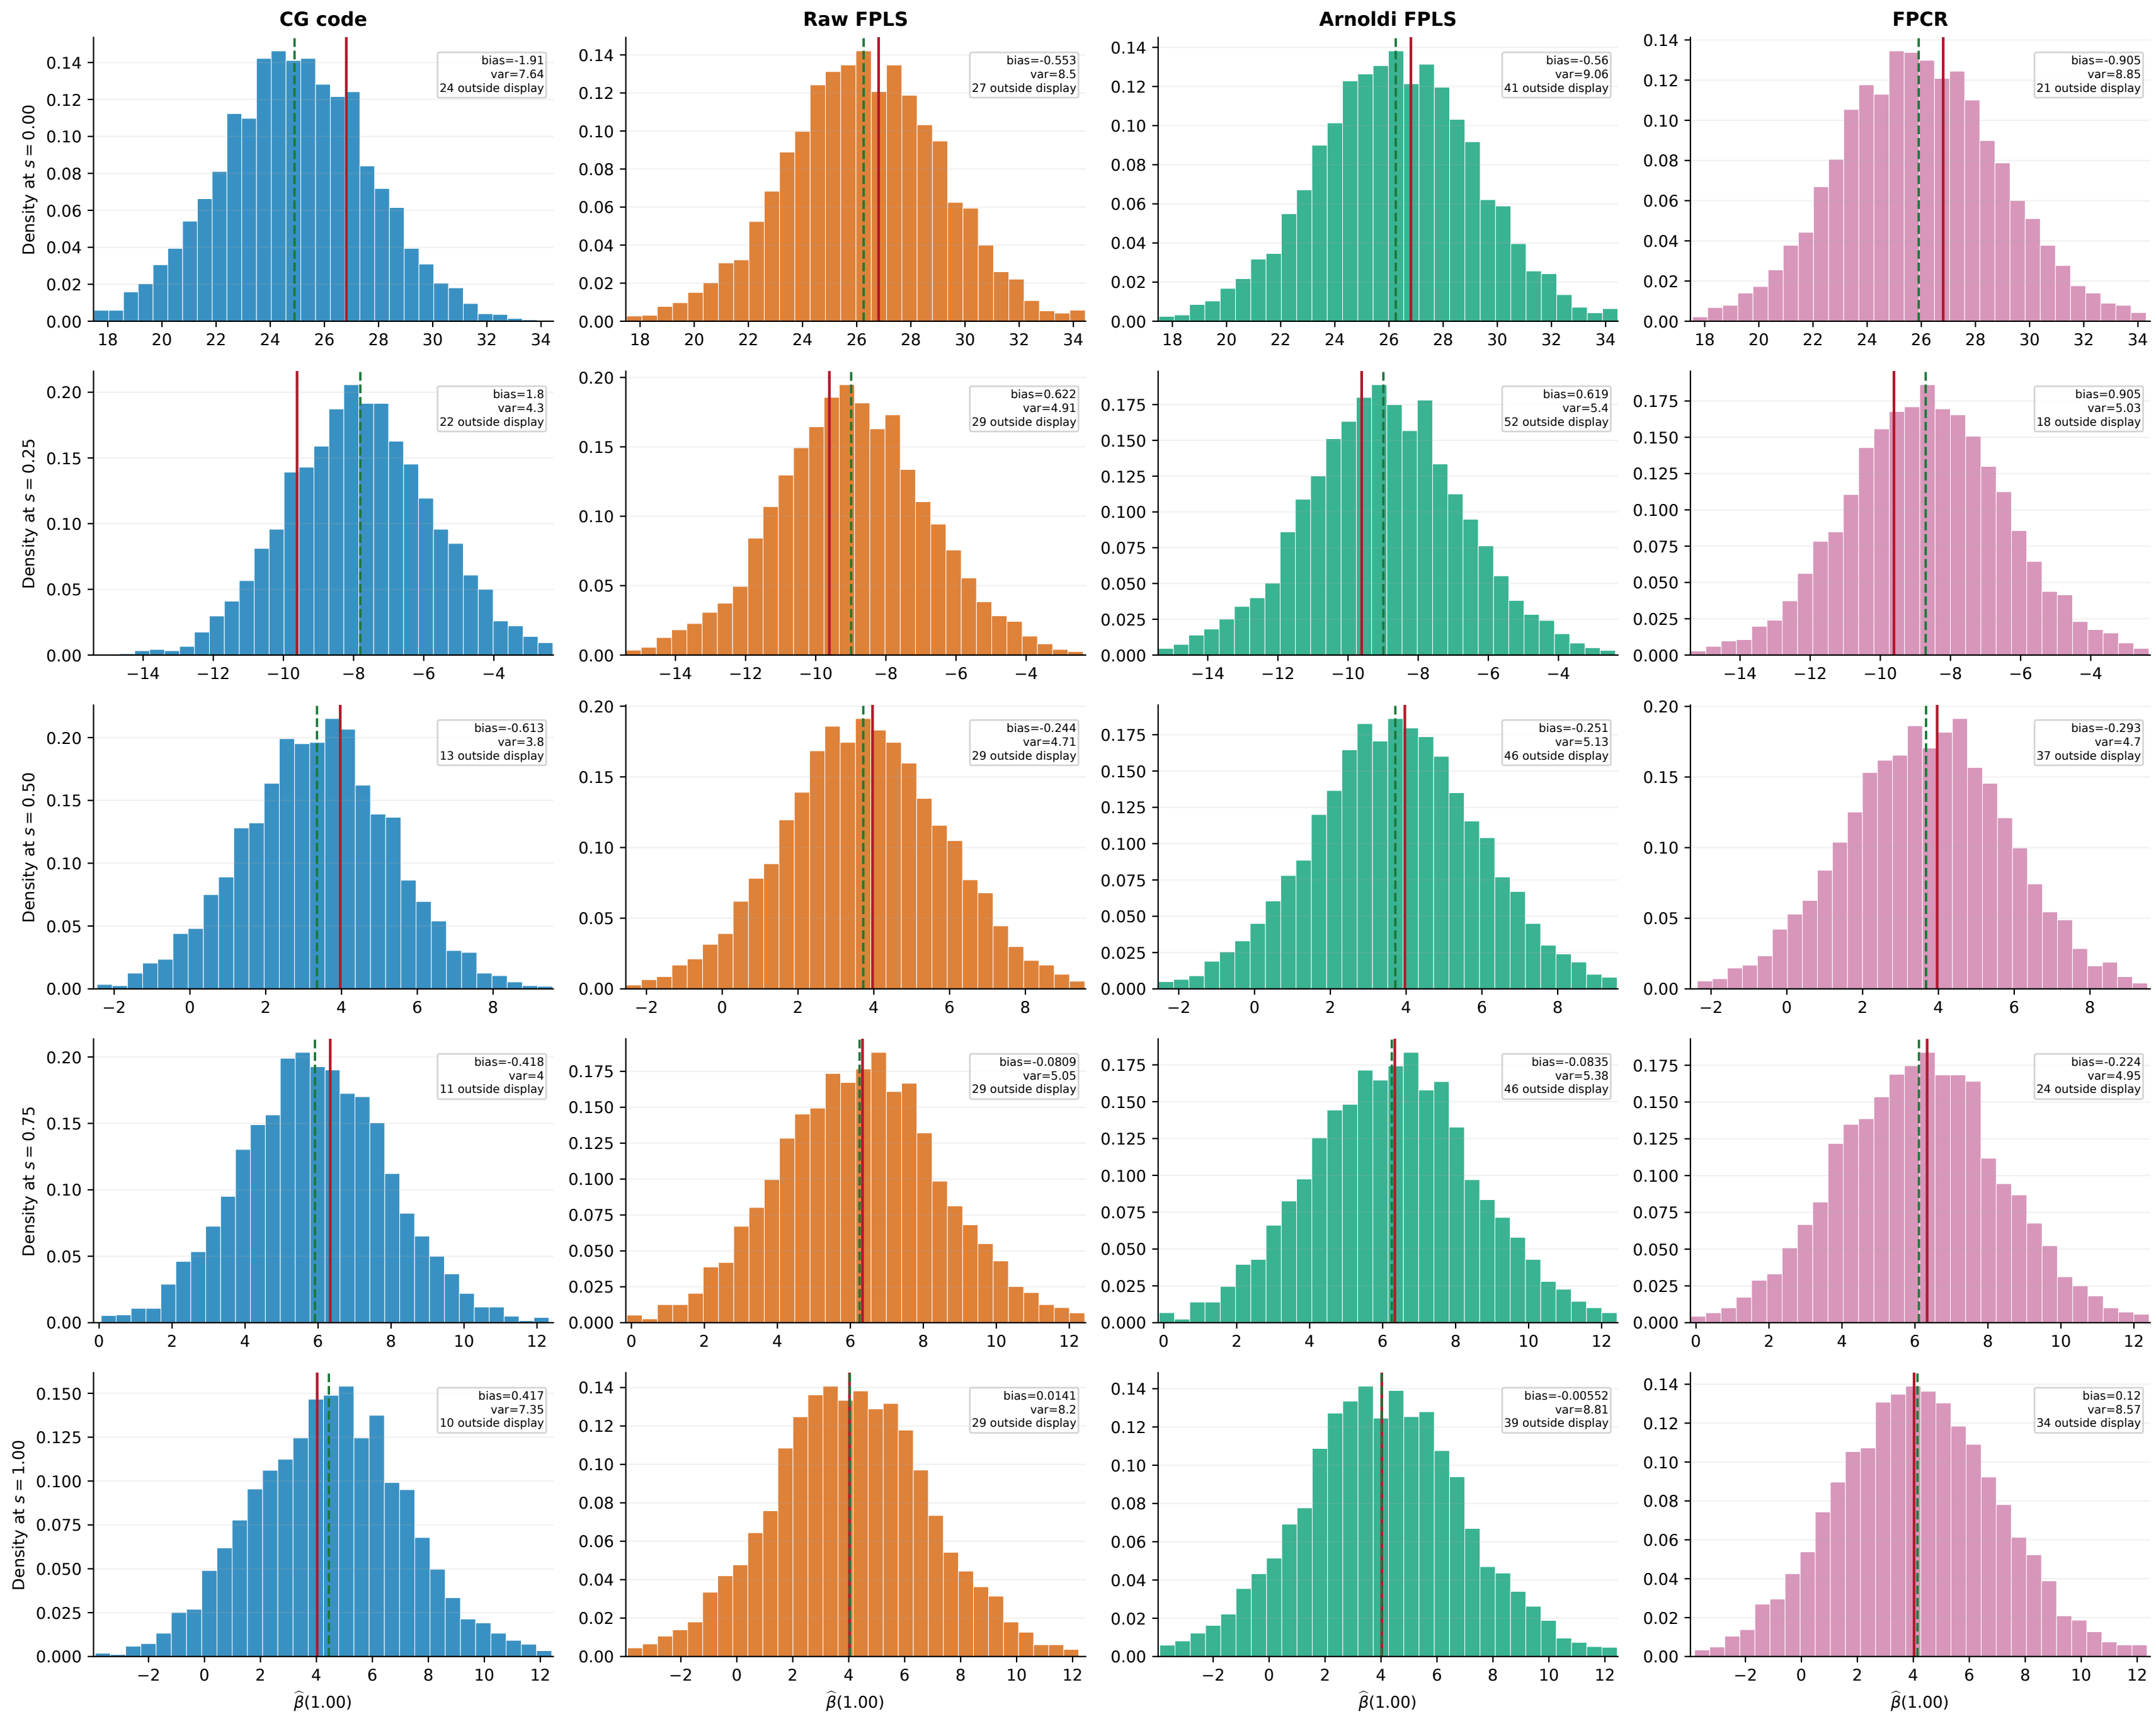

— True — Mean

Axes show the central 99% pooled range; omitted numerical tails are counted. Raw-FPLS panels use archived fits not flagged as numerically unstable.

Model 2: pointwise distributions of the selected slope estimate

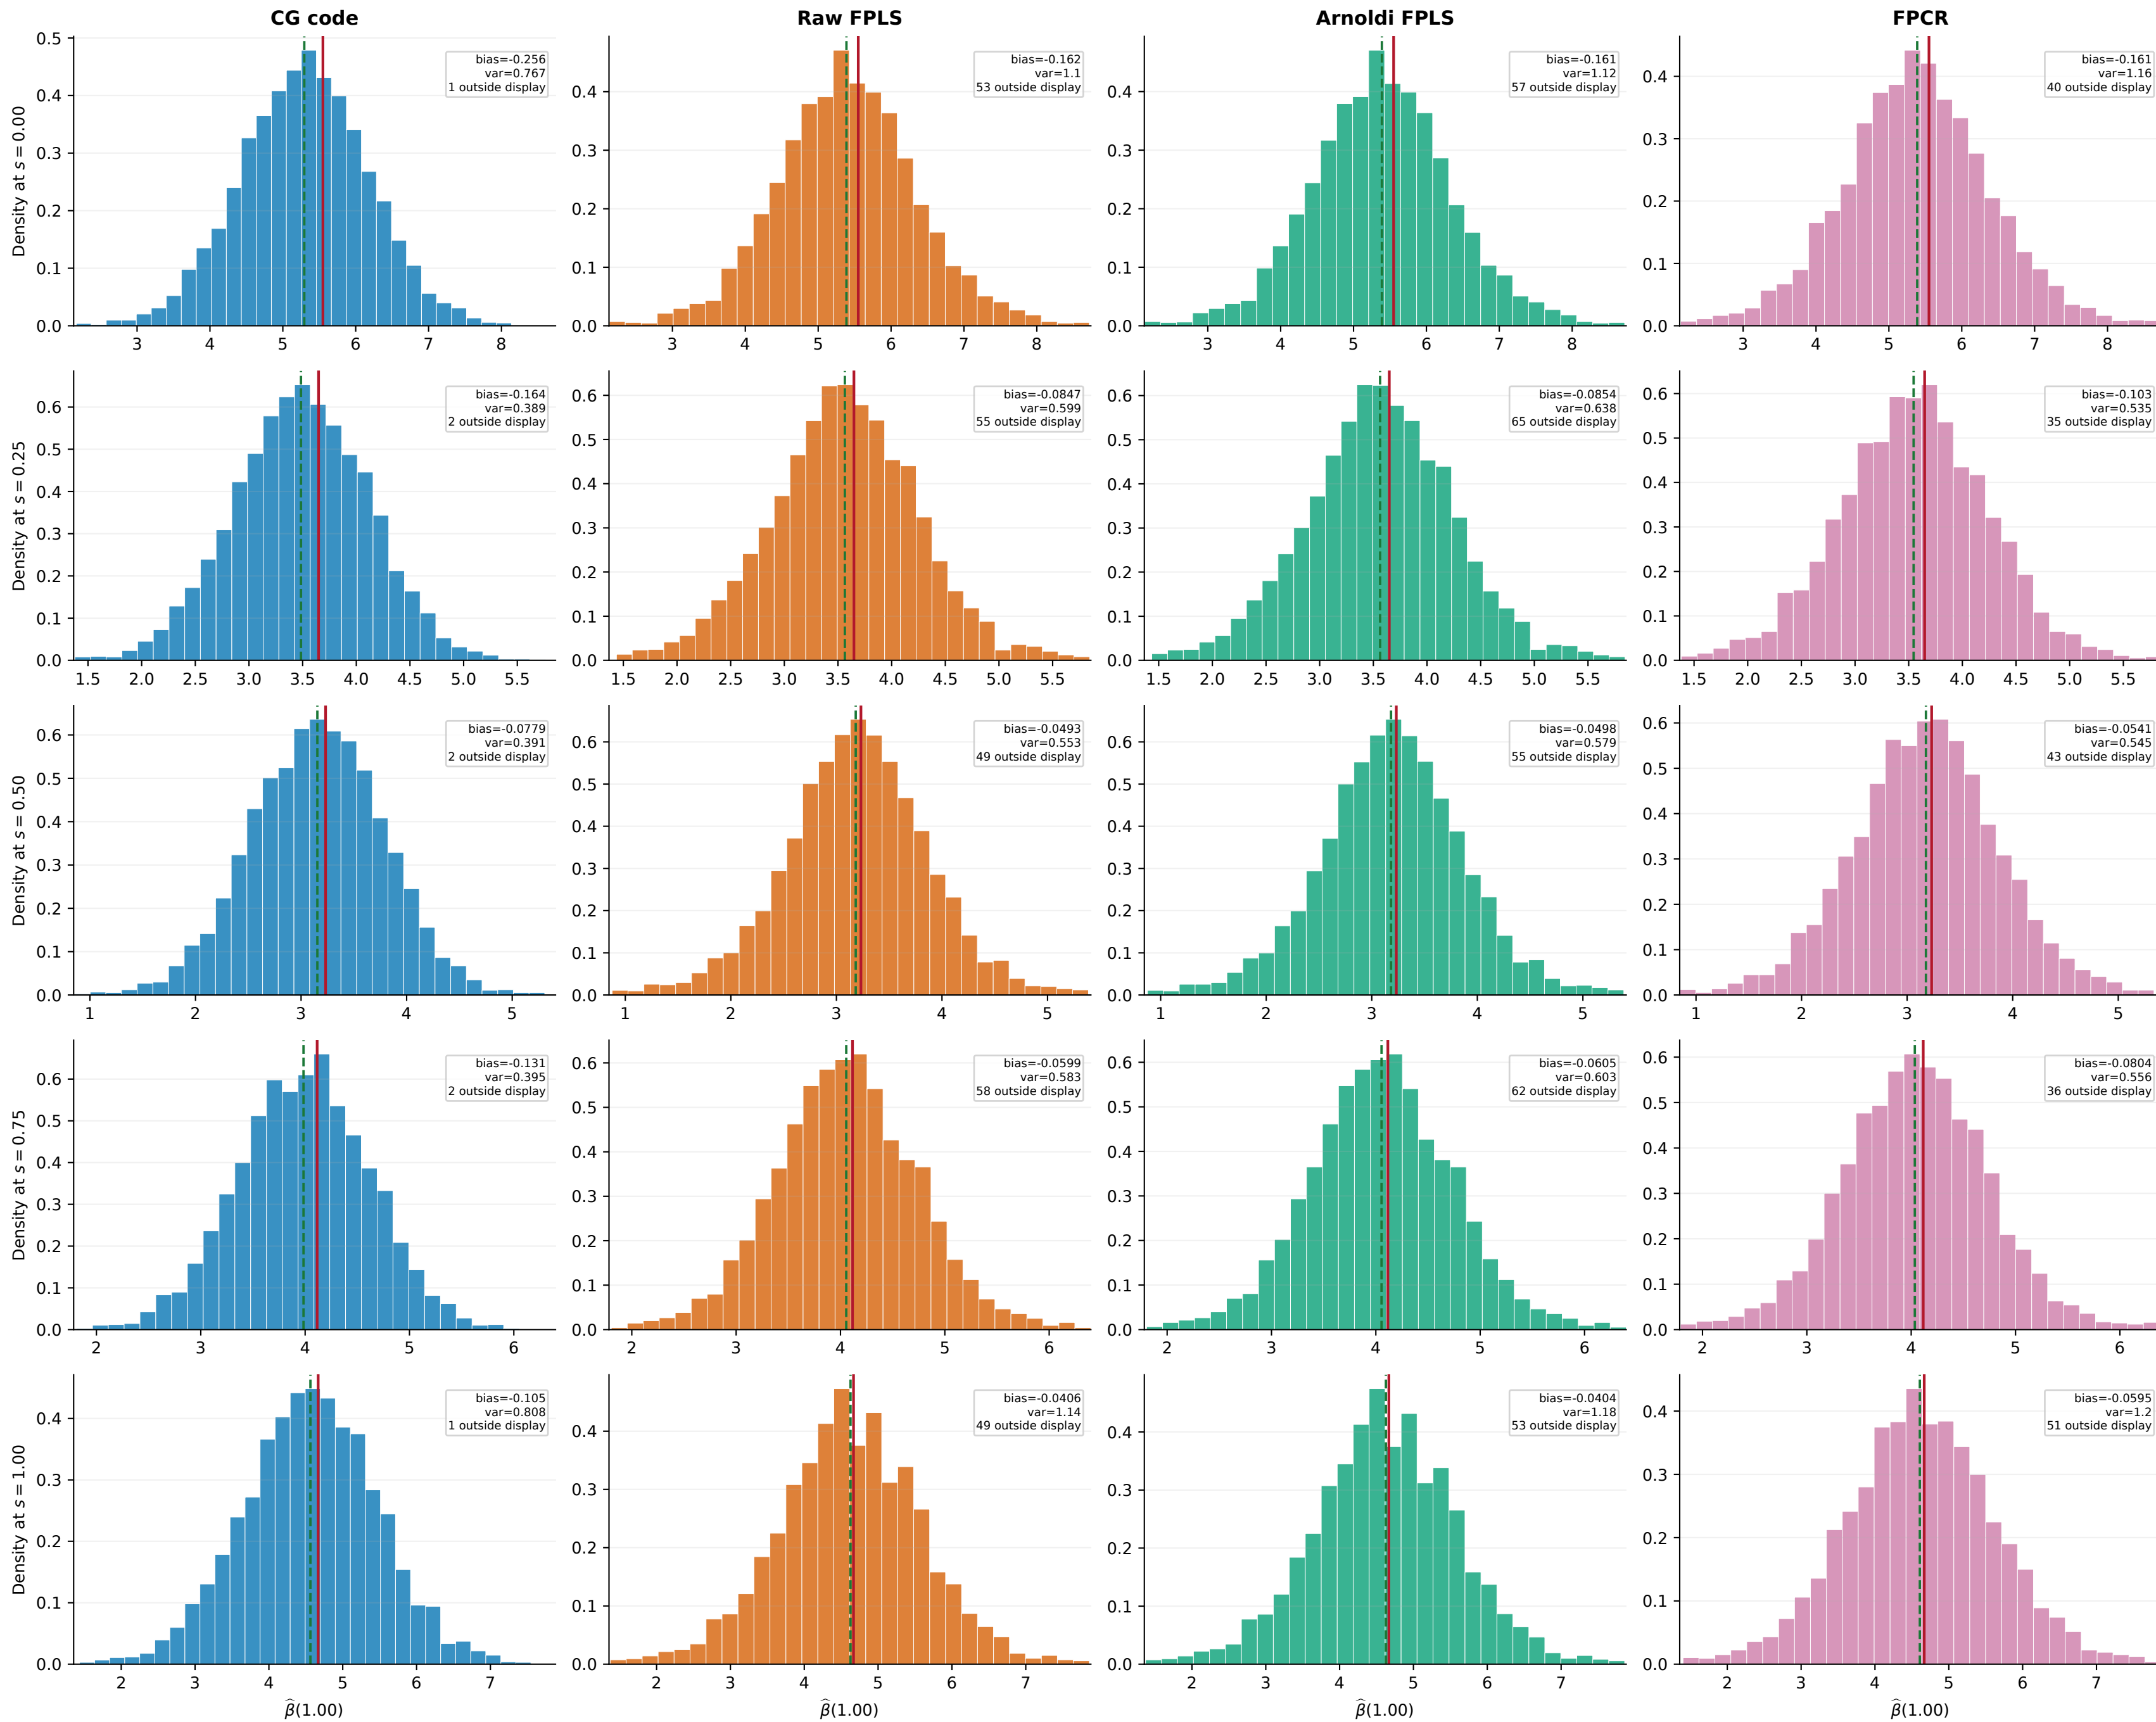

— True — Mean

Axes show the central 99% pooled range; omitted numerical tails are counted. Raw-FPLS panels use archived fits not flagged as numerically unstable.

Model 3: pointwise distributions of the selected slope estimate

— True — Mean

Axes show the central 99% pooled range; omitted numerical tails are counted. Raw-FPLS panels use archived fits not flagged as numerically unstable.
